Mr. William J. Casey
Director
Central Intelligence Agency
Washington, D.C. 20505

Gentlemen:

Booz, Allen & Hamilton Inc. provides diverse consulting services to a wide variety of government agencies, public institutions, and private corporations--including the Central Intelligence Agency.

In May 1983, Booz, Allen reorganized its Energy Practice to enable the firm to better serve the government sector. As a result, the Defense Technology Division, headquartered in Bethesda, Maryland, now provides energy-related engineering, economics, and management consulting services in five key areas:

- . Program planning support--including strategic program development, project monitoring, and budgetary analysis
- . Market assessments--evaluating natural resource development, technology adoption, and fuel substitution
- . Technology evaluation--for example, competitive economic and technical assessments
- . Forecasting and modeling--including energy supply, demand, and pricing forecasting and end-use energy demand modeling
- . Policy analysis--such as analysis of utility rate regulation, tax incentives impact, and nuclear proliferation issues.

Our organization is comprised of individuals with industrial and military experience and expertise as diverse as operations research, nuclear science and engineering, finance and economics, technology commercialization, and political instability analysis.
